Bank code: 20404
BIC: SBGSAT2S
IBAN: AT332040400040445165

2. General provisions

In the case of newborn analyses, the terms and conditions for genetic testing apply in addition to this section. In newborn analyses, metabolism waste products are measured in the urine, which may provide information on the existence of certain (genetic) metabolic diseases. The analysis is a diagnostic aid for the presence of the analyzed diseases. In addition, recommendations are given for the treating physician to better deal with the identified disease in the case of a positive result. It is the duty of the parent or guardian, where appropriate, to seek a (children) physician to follow the recommendations for the treatment or prevention. The area of responsibility for the treatment is in the sphere of the treating physician. All the laboratory provided recommendations are only seen as a suggestion / inspiration for the treating physician.

3. Disclaimer

The laboratory shall only be responsible for the field of technical analysis. It is in no way liable for the effectiveness of the recommended treatment or for any health, financial or property damage caused by the analysis result.
